

Supported Browsers

Last Modified on 03/03/2016 3:22 pm EST

There are certain web browsers that are too far out of date or that are not supported by their original developers, which are not compatible with the tools and functions available on GoFiler Online. If you find that a tool doesn't appear to be functional or that parts of the site do not display correctly, verify that you are using one of the supported or the recommended browsers to access the site.

The website requires a web browser that is HTML5 and CSS3 compliant with Javascript enabled. The Supported Browser List below contains browsers that have been tested for compatibility.

Supported Browser List:

- Internet Explorer 9 or later
- Microsoft Edge
- Firefox 20 or later
- Chrome 28 or later
- Opera 15 or later
- Internet Explorer Mobile 11 or later
- Mobile Browsers on Android 4.0 or later
- Safari on OS X or iPhone 6

Recommended Browser List:

- Internet Explorer 11
- Microsoft Edge
- Firefox 40 or later
- Chrome 40 or later

Although GoFiler Online does not require Microsoft Windows to operate, Go16 Online will not launch from a browser running on a non-Windows computer.
