

Showing Sensitive Information

Last Modified on 03/03/2016 1:33 pm EST

You may find that you would like to show certain information when accessing your libraries of EDGAR data or your EDGAR settings. You can use your User Preferences to show EDGAR CCC information wherever it appears while you work on-line. You can also show password information, such as your library passwords, when you are setting or changing passwords.

To show sensitive information:

1. Click on the *Preferences* link located in the left navigation bar.
2. In the *EDGAR Settings* area, press the *Edit EDGAR Settings* button.

The screenshot shows a user interface with a 'Manager:' label, 'Revision:', and 'Comments:' fields. Below these is a 'Web Settings' section with 'Hide Passwords: Yes' and 'Hide CCCs: Yes'. A red arrow points to a button labeled 'Edit EDGAR Settings' which is enclosed in a red rectangular box.

3. In the form that appears, locate the *Web Settings* area.

The screenshot shows a form with 'Revision:' and 'Comments:' input fields. Below them is a 'Web Settings' section highlighted with a red box, containing 'Hide Passwords: ' and 'Hide CCCs: '. At the bottom of the form are 'Update' and 'Cancel' buttons.

4. Uncheck the *Hide Passwords* option to show your on-line passwords. Uncheck the *Hide CCCs* option to show all on-line CCCs, including CCCs contained in your libraries.
5. Press the *Update* button to save the *Web Settings*.

Helpful Hints:

- Showing CCC and password information will only hide that information while you are working within GoFiler Online. If you are working within Go16 Online, CCC information may not be visible depending on the settings you choose within Go16 Online.
